Store policy Q&A · knowledge base rollout · HQ-to-store phased enablement

Case summary · anonymized · for internal forwarding · Version 2026-07-30

Confidence note: Figures describe a typical phased rollout. Actual timelines depend on knowledge prep and seat count.

1. Customer background & pain

Regional chain retailer: HQ plus 120+ stores. Staff repeatedly asked HR about leave, shift rules, and benefits — HQ inbox overloaded.

Need one place for leave approval, policy Q&A, store reports, and notices — usable on web and phone.

2. Solution scope

Leave / approval flows, policy knowledge Q&A, store reporting and broadcast notices.

One publish to five ends (Web · iOS · Android · Windows · macOS). Knowledge base linked so natural-language questions return accurate answers.

3. Knowledge governance

HQ HR owns policy source docs; store managers see scoped answers. Optional approval before publishing policy updates.

RBAC keeps HQ vs store visibility clear; audit logs available for compliance review.

4. Rollout rhythm

Week 1–2: HQ HR pilot and knowledge import. Then phased store enablement across 120+ sites.

First scene often live in ~5 minutes after template selection; full policy packaging typically ~2 weeks.

5. Commercial & next steps

Standard PaaS by seat. Pair with pricing page and Trust Center for procurement review.

Book a demo to get the full retail materials pack and sample knowledge import checklist.

Appendix • Review worksheet (page 2)

1. Map your internal review questions to sections above:

Q ____ → Section ____ Q ____ → Section ____

2. Preferred deployment: ☐ PaaS ☐ Hybrid ☐ On-prem ☐ TBD

3. Systems in scope: IdP____ ERP____ CRM / TMS____ IM____

4. Pilot success metrics (quantified): _____

5. Must-keep controls (e.g. human confirm, data residency): _____

6. Target go-live window & owner: _____
